

Part I Writing

参考范文：

With the application of information technology in education, college students can now learn in more diverse and efficient ways. In recent years, information technology changes with each passing day and gradually integrates into all aspects of our daily life.

At the same time, more and more people begin to realize that information technology plays a key role in education. In my opinion, its advantages are mainly reflected in the following aspects. Firstly, applying information technology to education makes up for many shortcomings of traditional education. For example, compared with traditional education, networked information technology can provide a virtual teaching environment and good teaching management functions, which brings vitality to modern teaching. Secondly, modern information technology provides a broader teaching space, so that teaching resources can be shared in real time, and plays a better role in providing learning resources for students and assisting them to solve learning difficulties. Finally, with the help of various information tools, students are expected to be more autonomous and enthusiastic.

In brief, the importance of information technology in education cannot be overemphasized.

Part IV Translation

参考译文：

The Loess Plateau is the third largest plateau of China, which covers an area of 600,000 square kilometers with an average altitude of 1,000-2,000 meters. The majority of the plateau is covered with loess of 50-80-meter thickness and it is the most concentrated area in loess distribution and the largest area in covering depth in the world. It is a miracle created by the nature and the one and only on earth.

The Loess Plateau is one of the birthplaces of the Chinese nation. People began to farm on The Loess Plateau as early as 5,500 years ago. With the consistent development of the farming industry, the population on The Loess Plateau increased continuously, making it the political and economic center of China in the Qin-Han Dynasty. Nowadays, with the implement of the strategy of China Western Development, the economy of the Loess Plateau area has developed rapidly.
